GPAC Member Since 10 October 2019

Artist Statement

Alyssa Waldron is an experimental filmmaker, photographer, and mixed media artist based in Pittsburgh. She is drawn to the nostalgic quality of photographs, which through their manipulation in collage, force the reconstruction of their initially perceived narrative. Waldron’s works create commentary on the function of images as a means for documentation and storytelling, suggesting a detachment in the process of preservation, a fear of becoming obsolete, and the evolution of technological mediums over time.
