Artist Statement

I created a studio practice to explore the curiosities that objects and spaces contain. Nostalgic, salvaged, and authentic materials and craftsmanship play a starring role in the poetic objects and spaces created. A deliberate attempt is made to draw the viewer into an enchanted world in which objects have the ability to be quietly transformed into a surreal playing field for the imagination. Positioned between fine art and design, I creates objects and spaces that are minimal, thoughtful and full of meaning one might not expect.
